RESEARCH

Place-based policies, female labor and structural change: Evidence from India's Special Economic Zones

joint with Johannes Gallé (U Bochum), Nadine Riedel (U Münster) and Tobias Seidel (U Duisburg-Essen)

This paper quantifies the local economic impact of Special Economic Zones (SEZs) that were established in India between 2005-2013. Based on a novel data set that combines census data on the universe of Indian firms with georeferenced data on SEZs, we find that SEZs increased manufacturing and service employment with positive spillover effects up to 10km. This employment gain was paralleled by a decline in local agricultural employment, in particular of women, suggesting that the policy contributed to structural change. We find no evidence for heterogeneous effects between privately and publicly run SEZs or zones with different industry denominations.

The Taxation of Microenterprises

joint with Eliya Lungu
